New Windchill PLM New Veoneer Partner Portal (VPP)

Training for Suppliers
Arnaud Soret

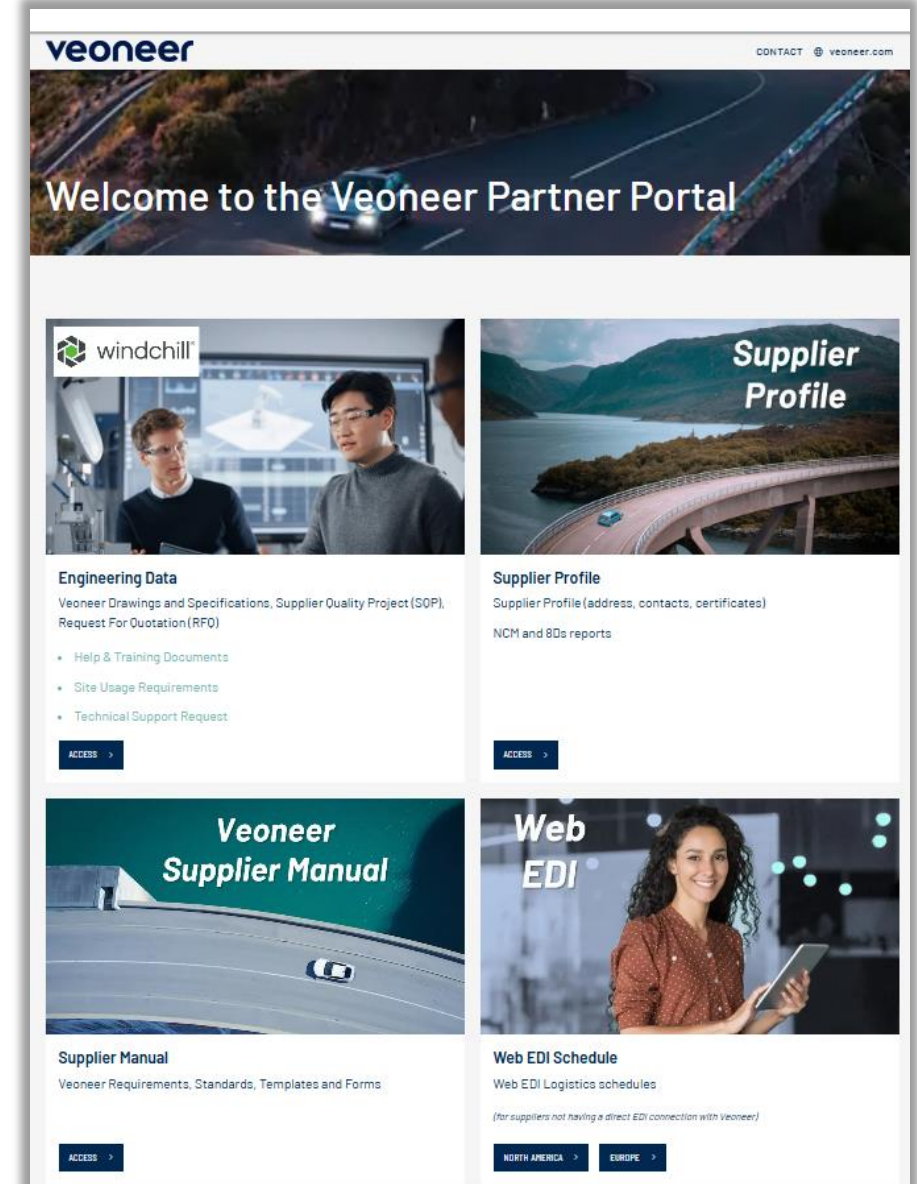

New VPP

- There is a new **Veoneer Partner Portal (VPP)** website where you could find the four different applications.
- No password or login is required to access this site.

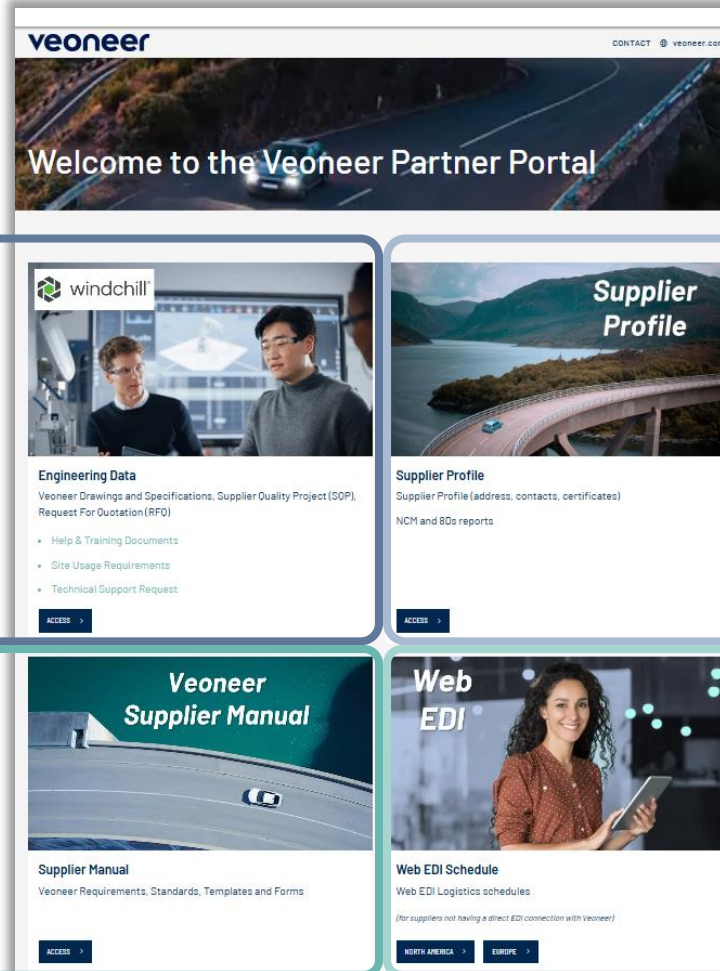

New Veoneer Partner Portal

<https://partner-portal.veoneer.biz>

- The old VPP will soon be decommissioned.
(<https://www.veoneer.biz/enovia/alvPortalLogin.jsp>)
- If you bookmarked this site, please update it

Access to 4 Applications

Single Sign-On (SSO) & Multi-Factor Authentication (MFA)

We have implemented **Single Sign-On (SSO)**
for Supplier Users to access:

- > *Engineering Data /Windchill PLM*
- > *Supplier Profile*

Once you've completed the initial setup, you won't need a password anymore, just your email address as login

There is a limited number of Users per Supplier ID

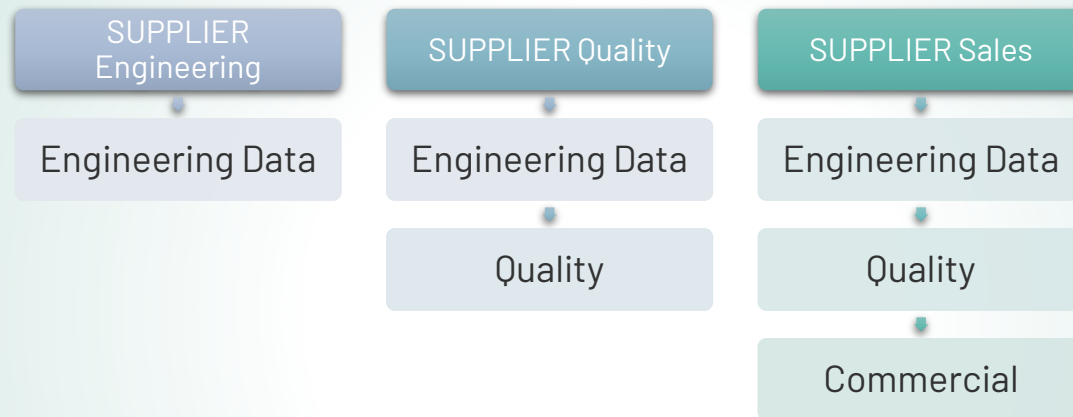

To further enhance security, we are introducing
Multi-Factor Authentication (MFA)

This additional layer of security will help protect your account and ensure that only authorized users can access the system

You can decide which contact mode you prefer (Phone, ...)

3 different roles for Supplier Users

- To segregate accesses within your company, each user can have 3 different roles in Windchill PLM:

- **'Sales'** can access everything, including RFQ and Quotes
- **'Quality'** can access PPAP/SQP on top of Engineering Data but can't see Commercial items
- **'Engineering'** can access Engineer Data but can't see Quality or Commercial items

- Roles have been defined according to information received from your company some month ago.
- Contact your Lead Buyer if you need to change your role or add more users.
